## About EuPA

- The European Proteomics Association (EuPA) was founded in 2005 and is a federation of 21 European National Proteomics Societies. It coordinates and integrates national initiatives within the field of Proteomics.
- EuPA's main objectives are to strengthen and promote fundamental research and applications, as well as education and training in all areas of Proteomics throughout Europe.
- EuPA welcomes involvement and collaboration from scientists and organizations of any kind.

# Major Activities

## Education

- Further develop the quality of Proteomics knowledge through educational programs.
- Coordinate workshops and courses to advance Proteomics knowledge in life sciences, and Proteomics awareness with the general public and governmental bodies.
- Coordinate and promote EU-wide scientific exchange for young researchers to enhance their scientific career and promote cultural exchange and acceptance throughout Europe.

## New Developments

- Spearheading of technological and scientific Innovations in Proteomics
- Encouragement of three year projects
- Support of Pan-European benefits
- Encouragement of any effort that supports proteomics including applications, services, technology and society

## Conferences & Communication

- Coordination between EuPA General Council and National Proteomics Societies for EuPA congress organization.
- Coordination of EuPA workshops
- Coordination of EuPA Web site development and maintenance
- Coordination of EuPA communication

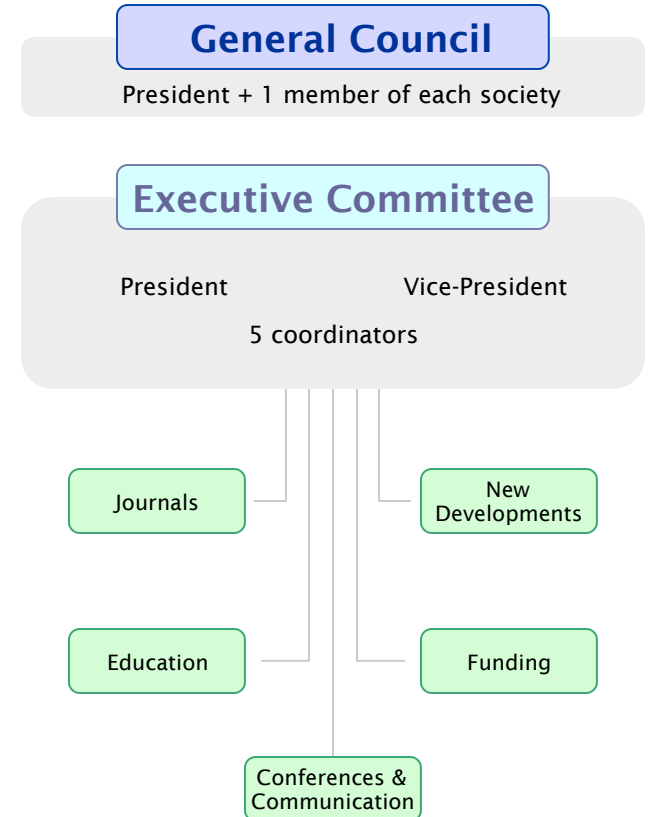

## Journals

- Uniquely position EuPA's journals
- Coordinate journal activities
- Prepare news flashes, newsletters for publishing

## Funding

- Support attendance of students and young proteomics researchers to EuPA endorsed courses, workshops and other educational activities
- Create a platform of fruitful cooperations
- Setting Proteomics standards at a high level with the support of companies [the EuPA Company Club]
- Provide prospective visibility for the next generation of researchers
