

PME11 – Phosphoproteomics

Objectives:

To allow each laboratory to assess its ability and improve their protocols for phosphopeptide analysis.

The study should allow for:

- Evaluating the performance and reproducibility of phosphopeptide enrichment procedures.
- Testing the usefulness of phosphopeptide mixture standard to set up, monitor, and troubleshoot phosphopeptide analysis methods.

Proposed calendar for the study:

- Distribution of the samples: first two weeks of March 2016.
- Deadline for results submission: May 15
- Presentation of results at EuPA Conference 21-25 June
